

Klaipeda 2013.02.12

We, JSC "Baltic Group", in 2013 started using Ctech fuel and oil additives in marine vessel "Global 1". We can admit, since we started using LubeAID oil additive, we've got higher engine performance, lower engine noise, significantly reduced oil consumption in the engine and increased the power.

Also we use Marine DieselAID fuel additive, in result obviously reduced smoke, cleaned up fuel tanks and reduced fuel consumption.
