

REGARDING USAGE OF CTECH PRODUCTS

2014-12-19

We, JSC "Mosola", start using Ctech products in 2014, in our transport department (trucks, passenger vehicles).

After using engine cleaner FlushAID, oil additive LubeAID and fuel additive DieselAID we can note that – reduced oil consumption during vehicles operation, significantly decreased or even disappeared smoke, smoother and quieter are working engines, better starts up, also reduced average fuel consumption in average of about 11%. We use Ctech products in DAF 95XF 480 (2006 year model), DAF 105XF 460 (2006 year model), VOLVO FH 12.420 (2003 year model), DAF 75 300 (1997 year model) trucks and BMW 530D (2003 year model), VW Transporter 2,5TDI (1997 year model) cars.

We are very satisfied with the results.

We recommend using JSC "Gevegesa" distributing Ctech company products.
